

1 My Polling Place

The My Polling Place web application allows members of the public to find the polling place for their local voting district.

The application opens to the "Find My Election Polling Place" widget. As you type an address into the search box, suggestions will appear below.

You can also use the Location tool to place a location on the map.

The map will zoom to the extent of the address point, the voting district and the polling place. Information about the polling place will appear in the right hand side of the screen, including address, the name of the location and polling hours. Clicking the "Get Directions" link will take you to Bing maps where you can enter your address and get directions.
