Section 13.03 of the Blendon Township Zoning Ordinance specifies that to approve a special land use, the Planning Commission must find that the request meets the following standards. Please describe how the proposed project would meet each standard.

A. Compatibility with the Master Plan: The proposed Special Land Use shall be compatible with and in accordance with the general principles and objectives of the Blendon Township Master Plan and shall promote the intent and purpose of this Ordinance.

B. Compatibility with Adjacent Uses: The Special Land Use shall be designed, constructed, operated and maintained in a manner harmonious with the character of adjacent property and the surrounding area. In determining whether a Special Land Use will be harmonious and not create a significant detrimental impact, as compared to the impacts of permitted uses, consideration shall be given to the degree of effect the Special Land Use may have on adjacent property, as compared with the expected value to the township. The following types of effects shall be considered:

- (a) use activities, processes, materials, equipment, or conditions of operation;
- (b) vehicular circulation and parking areas;
- (c) outdoor activity, storage and work areas;
- (d) hours of operation;
- (e) production of traffic, noise, vibration, smoke, fumes, odors, dust, glare, and light;
- (f) impacts on adjacent property values; and
- (g) the relative ease by which the impacts above will be mitigated.

C. Impact of Traffic on the Street System: The location and design of the proposed Special Land Use shall minimize the negative impact on the street system in consideration of items such as vehicle trip generation (i.e. volumes), types of traffic, access location and design, circulation and parking design, road capacity, traffic operations at proposed access points, and traffic operations at nearby intersections and access points.

D. **Impact on the Overall Environment:** The proposed Special Land Use shall not have an unacceptable significant adverse effect on the quality of the natural environment in comparison to the impacts associated with typical permitted uses.

E. **Compliance with Zoning Ordinance Standards:** The proposed Special Land Use shall be designed, constructed, operated, and maintained to meet the stated intent of the zoning district.

F. **Public Services:** The proposed Special Land Use shall be located where it can be adequately served by essential public facilities and services, such as streets, pedestrian or bicycle facilities, police and fire protection, drainage systems and water and sewage facilities.
