

Building addition at the Township Offices

You may have noticed some construction activity at the Township property on 72nd Ave. Work is beginning in early March for a “multi-purpose” addition; approximately 6,140 square feet.

It will contain secure facilities for all Blendon Township’s election equipment under one roof, plus enough space to accommodate a possible future voting precinct with growth. Township meetings will be held in the new addition.

The approximate cost is \$1.5 million; with almost half of that coming from the Federal Government via ARPA funding. The Township will remain Debt-Free even after completion of the project.

A rendering of the addition is attached.

New Multipurpose Building
